Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1853 edition. Excerpt: .horizontal lines of growth. Smaller valve slightly convex and depressed, the hinge-line forming an arch which merges imperceptibly into the lateral margins. Structure calcareo-corneous, with a distinctly punctured structure arranged in tubular layers; surface smooth, but presenting numerous lines of growth, and scattered or closely packed, slender, hollow spines, dilated at their base, and somewhat quincuncially arranged; no calcified supports for the arms. Muscular impressions unknown. 06.9. One of the species composing this remarkable genus was noticed in 1829,¹ but it was only in 1845,² that M. de Verneuil established the genus *Scalotreta*, which has been recognised and adopted by all subsequent naturalists, on account of the clearly defined characters which separate it both from *Crania* and *Terebratula*, where it had been located, as well as from all the other genera. Subsequent and most valuable information was thrown on the subject by the memoir...
