Grin Verlag Sep 2012, 2012. Taschenbuch. Book Condition: Neu. 210x148x8 mm. This item is printed on demand - Print on Demand Titel. - Diploma Thesis from the year 2010 in the subject Economics - Other, grade: 1,0, Helmut Schmidt University - University of the Federal Armed Forces Hamburg (Professur für Volkswirtschaftslehre, insb. Finanzwissenschaft), language: English, abstract: This thesis seeks to explore the two working hypotheses: Firstly, that Napoleon's alleged military superiority in terms of skill and battlefield competence over his peers can be empirically quantified and proven. Secondly, that the results of Napoleonic warfare can be predicted by applying the theory of Contest Success Functions to these battles. To address these claims this paper is organized into four sections: Theory The first of the conceptual sections summarizes the theoretical underpinning behind the economical understanding of conflict. This so called second approach and its merits are outlined and the history of these theoretical concepts is explained. Chapter three introduces the Ratio Contest Success Function (RCSF) put forth by Tullock and the Difference Contest Success Function (DCSF) employed by Hirshleifer, the concepts for predicting probabilities of success in conflict theory. History The fourth chapter gives a brief report on warfare during the Napoleonic ages. A special emphasis lies on an analysis that evaluates if the key parameters have been homogenous over the time and what kind of technology was employed during these battles. The results are then compared with the demands of conflict theory. The fifth chapter then explicates the data set. The different variables that could be obtained are introduced and at last the scope of the further analysis is specified. This is done by picking the variables that actually can be used for an in-depth quantitative. Modelling In the four chapters that deal with the actual modelling, the theory is applied on the historical data to...
