

A Laboratory Manual of Invertebrate Zoology (Paperback)

By Gilman Arthur Drew

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .is an enlarged portion of the alimentary canal. This has no relation to the heart, for which it is sometimes mistaken. Excretory and Genital Systems.--The excretory system consists of a pair of dark colored glandular organs that lie beneath the pericardium. Each communicates with the pericardium by a small opening that is not easy to demonstrate in dissections, and with the cloacal chamber by another small opening. By turning the two gills (of Venus) dorsally a very small papilla may be seen, just beneath the free border of the inner gill, lying in the cloacal chamber. On the tip of this papilla are two openings. The inner one is the opening of the excretory organ. The outer one is the opening of the genital duct. The genital glands are light colored organs that, during the breeding season, extend through the principal part of the visceral mass....
