KANTS COSMOGONY AS IN HIS ESSAY ON THE RETARDATION OF THE ROTATION OF THE EARTH AND HIS NATURAL HISTORY AND THEORY OF THE HEAVENS: WITH INTRODUCTION

DOWNLOAD

Theclassics.Us. Paperback. Book Condition: New. This item is printed on demand. Paperback. 82 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: . . . be supposed that there are other planets beyond Saturn which are still more eccentric in their orbits, and thereby have nearer affinity to comets, so that through a continuous gradation the planets finally become comets. The eccentricity in the case of Venus is yj of the semi-axis of its elliptical orbit; in the case of the Earth it is b ; in the case of Jupiter g ; in the case of Saturn $T1T$ of their respective semi-axes. The eccentricity therefore evidently increases with the distances. It is true that Mercury and Mars form exceptions to this law, on account of their much greater eccentricity than their actual distance from the sun would give; but we shall learn in the sequel that the same causes which explain why some planets obtained a smaller mass when they were formed, account for the deficiency of the impulsion required for a circular orbit, and consequently have produced their eccentricity; and in both respects this has left them incomplete. Is it therefore not probable that the decrease of the eccentricity of the heavenly bodies situated next beyond Saturn, may be perhaps just as gradual as in the case of those within its orbit; and that the planets are brought into relation with the race of comets by so much the less sudden deviations For it is certain that it is just this eccentricity that makes the essential difference between the comets and planets; and the tails and vapour heads of the...
